Leipzig, 17. September 2025

Alpenquerender UKV: Offertverfahren 2026

Sehr geehrter Herr Schletti,

wir bedanken uns herzlich für Ihr Schreiben vom 04. September 2025. CargoBeamer teilt die Vision, dass der alpenquerende Güterverkehr ab 2026 weiterhin auf der Schiene bleiben muss. Daher freut es uns, wenn Sie Ihre Kunden der RoLa aktiv auf unser alpenquerendes Angebot des unbegleiteten kombinierten Verkehrs hinweisen werden.

Hiermit möchten wir gleichzeitig unser Interesse am „Offertverfahren alpenquerender unbegleiteter kombinierter Verkehr 2026“ und der damit verbundenen Förderung bekunden.

CargoBeamer ist nicht nur konzeptionell bereit – wir planen mit betriebsfähigen Relationen, Terminalinfrastruktur und Rollmaterial, um ab Januar 2026 als Nachfolgelösung für die Rollende Landstraße zu starten. Deren aktuelle Kunden repräsentieren vielschichtige und mehrheitlich nicht-kranzbare Logistikströme, beispielsweise aus Deutschland, den Benelux-Staaten oder dem Vereinigten Königreich aus nördlicher sowie kontinentaler und maritimer Anbindungen auf südlicher Seite. CargoBeamer steht hierfür dank einer hohen Netzwerktiefe, verschiedenen Abfahrtsorten in Deutschland wie Italien und sowie langjährigen Erfahrung im transalpinen KV als starker neuer Partner bereit.

Ab Anfang 2026 können wir folgende startfähige Relationen realisieren oder bestehende Verbindungen ausbauen:

- Kaldenkirchen – Domodossola als bestehende Verbindung mit rund 20 Rundläufen je Woche zwischen Westdeutschland und Norditalien ist bereits die hochfrequenteste Relation im transalpinen kombinierten Verkehr. Sie kann auf bis zu 23 wöchentliche Rundläufe ausgebaut werden. Mit Start/Ziel Domodossola kann diese Relation eine zuverlässigere Qualität gewährleisten als die heutige RoLa nach Novara.
- Stuttgart/Kornwestheim – Domodossola (bestehende Verbindung mit aktuell 3 Rundläufen wöchentlich) kann auf bis zu 5 Rundläufe erhöht werden, um von Südwestdeutschland aus den Märkten in Norditalien, der Region Genua sowie Nordafrika zu erreichen.
- Parma – Liege/BE als neue Verbindung ist in Vorbereitung und kann mit 6 wöchentlichen Rundläufen verkehren.
- Karlsruhe – Parma als neue Verbindung ist in Vorbereitung und kann mit bis zu 5 Rundläufen/Woche verkehren, um Zentral- und Süditalien an die deutschen Exportzentren anzuschließen.

- Frankfurt am Main – Mailand-Sacconago soll, ebenfalls als neue Relation, bis zu 12 Rundläufen wöchentlich abbilden und den Logistikstandort Hessen mit dem Wirtschaftszentrum Norditalien verbinden.

Weitere Details zu unserer aufgeführten Routenplanung, um eine schnelle Verlagerung zu ermöglichen, entnehmen Sie bitte dem anliegenden „Product Sheets“. Dieses dürfen Sie auch an Ihre RoLa-Kunden weitergeben.

Gern erläutern wir Ihnen unsere Vision persönlich in einem Gespräch.

Freundliche Grüße

Die neue Generation des transalpinen Güterverkehrs

CargoBeamer ist nicht nur konzeptionell bereit – wir planen mit betriebsfähigen Relationen, Terminalinfrastruktur und Rollmaterial, um ab Januar 2026 als Nachfolgelösung für die Rollende Landstraße zu starten. Deren aktuelle Kunden repräsentieren vielschichtige und mehrheitlich nicht-kanbare Logistikströme, beispielsweise aus Deutschland, den Benelux-Staaten oder dem Vereinigten Königreich aus nördlicher sowie kontinentaler und maritimer Anbindungen auf südlicher Seite. CargoBeamer steht hierfür dank einer hohen Netzwerktiefe, verschiedenen Abfahrtsorten in Deutschland wie Italien und sowie langjährigen Erfahrung im transalpinen KV als starker neuer Partner bereit.

Ab Anfang 2026 können wir folgende startfähige Relationen realisieren oder bestehende Verbindungen ausbauen:

- **Kaldenkirchen – Domodossola** als bestehende Verbindung mit rund 20 Rundläufen je Woche zwischen Westdeutschland und Norditalien ist bereits die hochfrequenteste Relation im transalpinen kombinierten Verkehr. Sie kann auf bis zu 23 wöchentliche Rundläufe ausgebaut werden. Mit Start/Ziel Domodossola kann diese Relation eine zuverlässigere Qualität gewährleisten als die heutige RoLa nach Novara.
- **Stuttgart/Kornwestheim – Domodossola** (bestehende Verbindung mit aktuell 3 Rundläufen wöchentlich) kann auf bis zu 5 Rundläufe erhöht werden, um von Südwestdeutschland aus den Märkten in Norditalien, der Region Genua sowie Nordafrika zu erreichen.
- **Parma – Liege/BE** als neue Verbindung ist in Vorbereitung und kann mit 6 wöchentlichen Rundläufen verkehren.
- **Karlsruhe – Parma** als neue Verbindung ist in Vorbereitung und kann mit bis zu 5 Rundläufen/Woche verkehren, um Zentral- und Süditalien an die deutschen Exportzentren anzuschließen.
- **Frankfurt am Main – Mailand-Sacconago** soll, ebenfalls als neue Relation, bis zu 12 Rundläufen wöchentlich abbilden und den Logistikstandort Hessen mit dem Wirtschaftszentrum Norditalien verbinden.

Weitere Details entnehmen Sie gern den anliegenden Product Sheets.

Your advantages with CargoBeamer

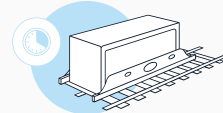

All semi-trailers

We enable rail transport for all standard semi without retrofitting!

Happy drivers

Drivers are used more efficiently and can spend more time at home with their families.

Loading and unloading

Complete loading and unloading of a train only takes 20 minutes with CargoBeamer.

Real-time tracking

Our "eLogistics" online platform allows booking transports easily and quickly.

Save costs and personnel

Logistics companies increase their profitability and work more effectively with CargoBeamer.

Sustainable transportation

Our service saves a large part of CO₂ emissions compared to a Diesel truck using the road.

Integrated first and last mile trucking

Drayage offered around all terminals of our network, connecting rail terminals to warehouses and important Ro-Ro-ports of the region.

- ✓ Maximum flexibility around terminals
- ✓ Virtually no organizational costs
- ✓ Single and rotational transport
- ✓ Higher throughput per driver

Leipzig, 16. September 2025

Transalpine Unaccompanied Combined Transport: Tender Procedure 2026

Dear Mr. Schletti,

We would like to thank you for your letter of September 4, 2025. CargoBeamer fully shares the vision that transalpine freight transport must continue to remain on rail as of 2026. We are therefore pleased that you intend to actively inform your Rolling Highway (RoLa) customers about our transalpine unaccompanied combined transport offering.

With this letter, we would also like to formally express our interest in the *Tender Procedure for Transalpine Unaccompanied Combined Transport 2026* and the associated funding.

CargoBeamer is not only conceptually prepared – we are planning with operationally ready routes, terminal infrastructure, and rolling stock in order to launch in January 2026 as a successor solution to the Rolling Highway. Its current customers represent diverse and predominantly non-craneable logistics flows, for example from Germany, the Benelux countries, and the United Kingdom on the northern side, as well as continental and maritime connections on the southern side. Thanks to our extensive network, various departure points in Germany and Italy, and many years of experience in transalpine combined transport, CargoBeamer stands ready as a strong new partner.

Beginning in early 2026, we can implement the following operational routes or expand existing services:

- Kaldenkirchen – Domodossola: Currently operating with around 20 roundtrips per week between Western Germany and Northern Italy, this is already the most frequent relation in transalpine combined transport. It can be expanded to up to 23 weekly roundtrips. With Domodossola as origin/destination, this route can ensure greater reliability than today's RoLa service to Novara.
- Stuttgart/Kornwestheim – Domodossola: Currently operating with 3 weekly roundtrips, capacity can be increased to up to 5 roundtrips, enabling access from Southwestern Germany to markets in Northern Italy, the Genoa region, and North Africa.
- Parma – Liège (Belgium): A new service under preparation, planned with 6 weekly roundtrips.
- Karlsruhe – Parma: A new service under preparation, expected to offer up to 5 weekly roundtrips, linking Central and Southern Italy with German export centers.
- Frankfurt am Main – Milan-Sacconago: Another new service, projected with up to 12 weekly roundtrips, connecting the logistics hub of Hesse with the economic center of Northern Italy.

The New Generation of Transalpine Freight Transport

CargoBeamer is not only conceptually prepared – we are planning with operationally ready routes, terminal infrastructure, and rolling stock to begin in January 2026 as the successor solution to the Rolling Highway. The current RoLa customers represent diverse and predominantly non-craneable logistics flows, for example from Germany, the Benelux countries, or the United Kingdom on the northern side, as well as continental and maritime connections on the southern side. Thanks to its extensive network, multiple departure points in both Germany and Italy, and many years of experience in transalpine combined transport, CargoBeamer is positioned to serve as a strong new partner.

Beginning in early 2026, we will be able to launch the following ready-to-operate routes or expand existing services:

- **Kaldenkirchen – Domodossola:** Currently operating with around 20 weekly roundtrips between Western Germany and Northern Italy, this is already the most frequent relation in transalpine combined transport. It can be expanded to up to 23 weekly roundtrips. With Domodossola as origin/destination, this route can ensure greater reliability than today's Rolling Highway service to Novara.
- **Stuttgart/Kornwestheim – Domodossola:** Currently operating with 3 weekly roundtrips, capacity can be increased to up to 5 roundtrips, enabling access from Southwestern Germany to markets in Northern Italy, the Genoa region, and North Africa.
- **Parma – Liège (Belgium):** A new service under preparation, planned with 6 weekly roundtrips.
- **Karlsruhe – Parma:** A new service under preparation, expected to offer up to 5 weekly roundtrips, linking Central and Southern Italy with German export centers.
- **Frankfurt am Main – Milan-Sacconago:** Another new service, projected with up to 12 weekly roundtrips, connecting the logistics hub of Hesse with the economic center of Northern Italy.

Further details can be found in the attached product sheets.

Your advantages with CargoBeamer

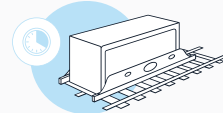

All semi-trailers

We enable rail transport for all standard semi without retrofitting!

Happy drivers

Drivers are used more efficiently and can spend more time at home with their families.

Loading and unloading

Complete loading and unloading of a train only takes 20 minutes with CargoBeamer.

Real-time tracking

Our "eLogistics" online platform allows booking transports easily and quickly.

Save costs and personnel

Logistics companies increase their profitability and work more effectively with CargoBeamer.

Sustainable transportation

Our service saves a large part of CO₂ emissions compared to a Diesel truck using the road.

Integrated first and last mile trucking

Drayage offered around all terminals of our network, connecting rail terminals to warehouses and important Ro-Ro-ports of the region.

- ✓ **Maximum flexibility** around terminals
- ✓ **Virtually no organizational costs**
- ✓ **Single and rotational transport**
- ✓ **Higher throughput per driver**
